APPLICATION:

A manufacturer of a variety of pain medications had a problem with excess dust in their production area.

SOLUTION:

Super-Max Stainless Steel extraction arms were proposed as they would meet the demands of this type of sensitive application.

PRODUCT DESCRIPTION:

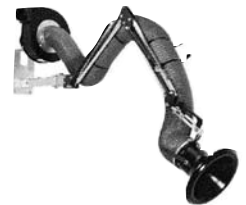

Super-Max Stainless Steel Extraction Arm

INDUSTRY:

Pharmaceutical Industry

TESTIMONIAL:

“We have had these arms for five years and like them as there is no danger of paint contaminating our product. They have ease of movement and can be adjusted. It has a grounding clamp that prevents electrostatic dust from clinging to the hose. We particularly like the fact that the mechanism is outside the hose and does not interfere with the flow.”
