

SPECIFICATIONS:

- The mechanical oil mist filter has a degree of separation of 95% of oil mists and up to 99.99% @ 0.3 microns of smoke with HEPA filters. These filter boxes have a large filtration area, are washable and are made of fiberglass media with aluminum separators. (The HEPA filters are not washable)
- The FLEXI-II Extraction Arm is a superior extraction arm c/w an advanced design 'Parallelogram' counter balancing system that eliminates the need for continual adjustment of friction joints and allows for an un-paralleled ease of movement. The FLEXI is an ideal solution for most "source-capture" applications. It is also specifically recommended for applications requiring an "easy to position" extractor that does not require constant adjustment. The design is compact and smooth, excellent for areas with low ceiling. The FLEXI Extractor Arm comes standard as 3m (10') long and Ø200mm (8") in diameter. Optionally other three (3) lengths are available: - 2m (6.7'), 4m (13') and 5m (17')
