

Flexi® extraction arm
not included

Wall-Flex® Cartridge Filter

Dust and Fumes

The Wall-Flex® Cartridge Filter is special designed for wall/column or stand mounting. The unit will supply 600 CFM @ 4" w.g. external static pressure, and is designed to be used as filtration unit for (1) 6.5" (160mm) extractor arm or for a small central extraction system. The unit comes standard with a spun-bound polyester filter - "washable" and it can be ordered with an activated charcoal filter (optional).

High Efficiency Filter

With up to 99,9% filter efficiency the Wall-Flex® Cartridge Filters will clean the premises of welding fumes and light grinding dust. The cleaned air is recirculated into the premises, with no heat loss at all. The access to the "maintenance-free" replaceable cartridge filter is easy and changing it takes just a couple of minutes.

A very profitable investment

LEV-CO Wall-Flex® Cartridge Filters decrease the need for general ventilation as well as the amount of dust in the air. Less dust will give less wear on the machinery, less cleaning in the workshop and in the office, better lighting (no dirty lamps), cleaner material handling (washing baths in the paintshop will last longer), higher working tempo (dirty air is tiring) and less absence (bronchial illness).

Few other investments will cut costs in the same way.

30 years experience

30 years experience of construction and production are at your disposal! LEV-CO extraction systems are a combination of well tested solutions and new ideas.

LEV-CO is always a step ahead, but not expensive!
