

Spring Recoil Hose Reels

4" (100mm) • 5" (125mm) • 6" (150mm) • 8" (200mm)

The Idea

The Spring Recoil Hose Reels are designed for removing exhaust gas emitted by exhaust pipes of every type of vehicle (cars, trucks, tractors, armored vehicles and means of public transport). They are perfect for bus depots, garages or service stations. They may be mounted under a roof as well as on a wall, supporting column or at the end of an extension boom. The hose is lowered manually against spring tension. The reel is equipped with a locking catch, which locks the reel at the required position. A further pulling of the hose releases the locking catch and then the hose reels automatically. Available in both Low Temp. as well as High Temp Hose.

- Low Temp. Hose: suitable for temp. of 250° F

- High Temp. Hose: suitable for temp. of 600° F

Easy to Install

Easy to install, they can be equipped with individual P-Max® fan or they can be incorporated in centralized overhead duct and fan system.

30 years experience

30 years experience of construction and production and at your disposal! The LEV-CO extraction systems are a combination of well tested solutions and new ideas.

LEV-CO is always a step ahead, but not expensive
