

The electric - driven hose reels are designed for removing exhaust gas emitted by exhaust pipes of every type of vehicles (trucks, tractors, armored vehicles). They are perfect for bus depots, garages, service stations and repair shops. On hose reel allows to attach and to reel the hoses of a different diameter and length. The reel is slide bearing mounted on side plates of its supporting frame. There is a tubular electric motor with gear inside the reel. The reel may be mounted on a roof as well as in a wall or at the end of an extension boom. Available in both Low Temp. as well as High Temp H

Low Temp. Hose: suitable for temperatures up to 250° F

High Temp. Hose: suitable for temperatures of 600° F

**CONSTRUCTION:**

Powder coated finishing electrical reel, hose, hose stop, hose clamps and low voltage pendant-type remote suspended from drop included. **The nozzle is NOT INCLUDED.**

**Note:** Hose will be shipped in a separate box

**FEATURES and BENEFITS**

- Roller-Blind Recoil ==> allows for easy access and simple storage of hose
- Custom Designed from Standard ==> ensures efficient capture and exhaust, specifically designed for your
- Self-Retracting Hose Reel ==> facilitates easy storage of hose
- Simple Hose/Nozzle Connections ==> allows for quick changes
