

Portable Vehicle Exhaust For cars & small trucks

The idea

For exhaust removal applications where stationary systems may not reach, the Portable Vehicle Exhaust system provides convenient exhaust removal for relief from the annoyance of vehicle exhaust. If not removed, vehicle exhaust can contribute to worker illness, increase facility maintenance expense, and harm the sensitive electronics of diagnostic and service equipment.

Incredibly easy to move

Lightweight and easy to handle, the Portable Vehicle Exhaust System is a practical solution for providing exhaust removal in areas where conventional systems cannot reach.

A very profitable investment

LEV-CO Portable Vehicle Exhaust System decreases the need for general ventilation as well as the amount of exhaust gases in the air. Less gas will give less

cleaning in the garage, higher working tempo (dirty air is tiring) and less absence (bronchial illness).

Few other investments will cut costs in the same way.

Product Overview

- Removes exhaust gases rather than just re-circulating it within the facility.
- One-person operation is made easy with standard wheels and support stand.
- Provides powerful collection power in a portable package.
- Operates with standard 115V power for use anywhere within a garrage.

30 years experience

30 years experience of construction and production are at your disposal! The **LEV-CO** extraction systems are a combination of well tested solutions and new ideas.

LEV-CO is always a step ahead, but no expensive!
