

# Case study

## E-Z EXTRACTION ARMS - FABRIS

### APPLICATION:

An exhaust solution was required for the welding processes which needed to meet the following criteria:

- Good fume extraction
- Extreme maneuverability
- Large coverage
- Minimal interference with the welding process

### SOLUTION:

The client researched several systems and decided to go with a central exhaust fan connected with ductwork to flexible E-Z arms, which offers a very easy positioning / repositioning possibility by the welders.

### PRODUCT DESCRIPTION:

- 1 (one) Central exhaust fan
- 2 (two) 14' long E-Z Extraction arms
- Installation and start up by LEV-CO

### INDUSTRY:

FABRIS Inc. - Rod and Bar Mill Equipment. Customized Advanced Machining Service

### TESTIMONIAL:

"Our welders like the flexibility of the arms. They take very little effort and they stay where you position them. The coverage and the suction are also great"
