case study

APPLICATION:

A machining and tooling company was using older open air tooling machines. They wanted to eliminate fugitive mist coming from their machines in order to clean up the air in the shop.

SOLUTION:

LEV-CO recommended the M-30 self-contained air-handling unit. Uniquely designed with a dual set of filters, one unit mounted on an interior wall would effectively handle the mist from 3 CNC machines. Cost savings would also be realized as the lower air-flow-to-filter ratio provides higher efficiency and longer filter life.

PRODUCT DESCRIPTION:

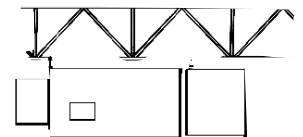

- 1 x M-30 Air Cleaning System
- 1 x Eyebolts (installed)
- 1 x Magnehelic Pressure Gauge
- 10 x AF-2 two-ply 8" neoprene hose (10')
- 50 x AF-2 two-ply 3" neoprene hose (50')

INDUSTRY:

Machine and Tooling Shop

TESTIMONIAL:

"Its like breathing fresh air again."
