## V2 - "ON-TOOL CAPTURE" OF GRINDING DUST - COFFEE MACHINE MANUFACTURING

©Copyright. All rights reserved. All information may not be reproduced, handed over, copied, xeroxed or translated into another language in any other form or means without permission from LEV-CO.

case study

### APPLICATION:

When using a pneumatic sander, particulates of steel would fill the plant creating a hazardous and uncomfortable work environment. The manufacturing company was looking for a system that would not have to be cleaned frequently, captured the dust at the source for two grinders, and would not restrict regular working areas.

### SOLUTION:

The Vibra Pulse V2 cartridge filter system with the low maintenance hopper option and 5 gallon drum has two inlets and up to 30' of hose for each grinder. The light weight hose makes it easy to work and maneuver on and around different sized cabinets and parts.

### PRODUCT DESCRIPTION:

- |            |                                      |
|------------|--------------------------------------|
| 1 x V2     | High vacuum dual filter collector    |
| 1 x Hopper | Hopper with stand with 5 gallon drum |
| 1 x PG-7   | 0-7" dial pressure gauge, mounted    |
| 2 x Hose   | 25' of high vacuum hose              |

### INDUSTRY:

Coffee Machine Manufacturing

### TESTIMONIAL:

"LEV-CO came up with a clean and inexpensive solution totally eliminating the dust problem. The Vibra Pulse does a great job keeping the filters clean, and we only empty the dust drum once a month."
