case study

APPLICATION:

A sign manufacturing company was having problems related to their welding application. Their welder was spending more time on sick leave than at work as problems developed from his breathing in the welding smoke during sign production. They needed a versatile and very portable air filtration unit.

SOLUTION:

LEV-CO recommended the Mobi-Flex which is a mobile extractor with 2 m extraction arms attached. The client now has the flexibility to plug and go anywhere in the plant. LEV-CO also designed a flange for the hood to further enhance the capture of welding smoke and to ensure that smoke stays away from welder.

PRODUCT DESCRIPTION:

1 x Mobi-Flex - mobile extractor unit

INDUSTRY:

Sign Manufacturer

TESTIMONIAL:

"We like the portability portability (plug & go) features of the unit. Above all, our welder hasn't had a sick day off since the unit was installed."
