

HI-VACUUM SYSTEMS

V SERIES © HIGH VACUUM SYSTEMS

The V Series High Vacuum Systems are filtration systems designed to be used to capture fumes & dust as close to the source of emission as possible. Typically fumes & dust are captured “On-Tool” (in the case of handheld grinders) or “On-Gun” (in the case of welding guns).

These collectors are typically sold in portable configurations, however they can also be configured as fixed systems with hoppers

and dust pails.

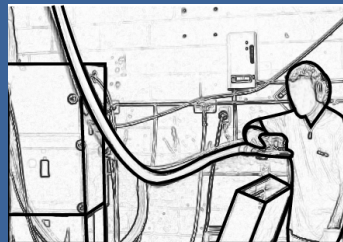

NB: hoses and fittings should be ordered separately.

Best suited for the following applications:

- Low, Medium & High production welding
- Structural Steel welding over large areas
- Heavy Grinding and abrasive cutting processes

STANDARD FEATURES

- ✓ Long Life (All steel construction)
- ✓ Portable design
- ✓ Suitable for 1 to 10 welders
- ✓ Vibra-Pulse filter cleaning system
- ✓ On-Demand flow control

- Extreme
- Heavy
- Medium
- Light

Select CFM and/or Auto-Start

| Part No. | Description | Price |
|----------|---|-----------|
| V2-2.5-1 | Portable High Vacuum Filter for up to 5 welders 230/460/3/60 | \$ 7,999 |
| V2-2.5-2 | Portable High Vacuum Filter for up to 5 welders 575/3/60 | \$ 7,999 |
| V410-5-1 | Portable High Vacuum Filter for up to 10 welders 230/460/3/60 | \$ 14,999 |

Options & Accessories

| Part No. | Description | Price |
|------------|---|----------|
| V-2-EXHE | External 99.97% HEPA Filter Option for Standard V-2 Unit | \$ 1,299 |
| V-410-EXHE | External 99.97% HEPA Filter Option for Standard V410 Unit | \$ 1,299 |
| V2-S | Silencer for V2 unit. | \$ 699 |
| V410-S | Silencer for V410 unit. | \$ 699 |
| OG-MG-001 | ON-GUN suction nozzle for most 250-400 amp. MIG welding guns, c/w hose and fittings | \$ 399 |

Replacement Filters

| Part No. | Description | Price |
|-----------|-----------------------------|--------|
| 7FR0-2912 | Replacement filter for V2 | \$ 160 |
| 7FR0-2016 | Replacement filter for V410 | \$ 240 |
