

Product FAB

Product: Porta Flex Standard		
Features	Advantages	Benefits
1 KW 115V/1PH/60Hz for single motor and 1+1 KW for dual motor	Ability to plug into any standard circuit	No additional cost to install/ or loss of production time
High efficient filter (99% @ 0.5 micron filter)	Capability to filter metallic fumes from applications like welding, grinding,...	Save energy by returning clean air to the plant
Washable/Cleanable filter	Ability to clean the filters	Low operation costs
Steel construction	Flame, melt and deform proof	Avoid high replacement costs
Small and light	Ability to carry with ease especially into small areas and zones where access is limited such as roofs and basements	Save space and production area/ User friendly
Flexible hose and magnetic nozzle	Ability to move easily and retain in position for capturing fume at source	User friendly and save energy as small HP is needed
Optional HEPA filter	Capability to filter very fine and harmful particulates such as chromium fume	Save energy by returning clean air to the plant
100 CFM @ hood for single motor and 200 CFM @ hood for dual motor	Ability to capture the fume at source @ 2"-4" from the hood. Ability to use capture at source welding gun with vacuum assist.	Save energy by using less amount of HP and air movement
